Where international, state, and/or county boundaries coincide, the map shows the boundary symbol only for the highest boundary of these boundaries.

1 A "–" following a place name indicates that the place is also a false MCD; the false MCD name is not shown.

2 In 1990, a census of vessels population of ships at sea was allocated to census tracts with a "99" prefix. An anchor symbol associated on the 1990 maps indicated a census of vessels tract. These maps show a very small MCD associated as a census tract with the census tract number shown near the area.

3 A "–" following a block number indicates that the block number is repeated elsewhere in the map.

The diagram illustrates various types of boundaries and features in a landscape, categorized into three rows:

- Row 1:**
 - Highway:** Represented by a solid black line.

Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- ¹ A "*" following a place name indicates that the place is also a false MCD; the false MCD name is not shown.
- ² In 1990, the crews-of-vessels population of ships at sea was allocated to census tracts with a "99" suffix. An anchor symbol appeared on the 1990 maps locating a crews-of-vessel tract. These maps show a very small area symbolized as a census tract with the census tract number shown near the area.
- ³ A "*" following a block number indicates that the block number is repeated elsewhere in the block.
